

I AM THE NCR FASTLANE SELFSERV™ CHECKOUT EXPRESS CONVERTIBLE

NCR FastLane SelfServ Checkout Express Convertible maximizes front-end lane availability and ease of service all within minimum space

Maximizing every little bit of space within a retail store is extremely valuable for profitability. At the same time, providing a fast and convenient front-end checkout is just as important for creating an outstanding customer experience. The NCR FastLane SelfServ Checkout Express Convertible enables a flexible solution for smaller stores to support both self-checkout and fully assisted checkout without the need to expand their footprint.

Offers the best of both worlds

The NCR FastLane SelfServ Checkout Express Convertible is especially well-suited for small store environments. Its staffing model enables it to accommodate the ebbs and flows of consumer traffic, allowing all lanes to be open all of the time while providing high customer service levels at the same time.

Easily converts to cashier mode

The NCR FastLane SelfServ Checkout Express Convertible quickly and easily converts through a swivel mount design that provides a secondary display and pinpad to change a self-checkout lane to a fully assisted point-of-sale lane in seconds. Cashiers can convert the software to “attendant mode,” which temporarily deactivates security features allowing them to “scan and bag” like a traditional checkout.

Maximize your space with a best-fit solution

NCR’s Store Business Consultancy team is uniquely positioned to provide the data-based modeling and expertise to operationalize the NCR FastLane SelfServ Checkout Express Convertible to maximize your front end to drive revenue and profitability.
