

I AM THE NCR SelfServ™ 4

Compact Interior Banking Transaction Kiosk for Financial Institutions

Empower your customers to do more

Suitable for any indoor location, the NCR SelfServ 4 is a compact financial kiosk that complements your tellers and ATMs. Migrating routine transactions like bill payments, appointment management, card dispense, product discovery and account maintenance onto the NCR SelfServ 4, gives your customers more choice of when and where they transact with their bank, whether in branch or off site. All this means your branch staff can dedicate more time to customer service, focusing on high-value product sales and cross-selling.

Designed to deliver the right consumer experience

We have built the SelfServ 4 on the XFS platform. This means you can easily extend software from your other channels onto the kiosk and make the most of the investment made in current channels. It also means your customers will enjoy a consistent and familiar experience when using the SelfServ 4.

Meet today's customer needs, by delivering multiple transactions

No matter what transactions you want to offer on your kiosk now or in the future the NCR SelfServ 4 can do it all. Its flexible and modular configuration will meet all your needs and its unique and modern design, including the large 19" multi-touch screen, will help you unlock superior consumer experiences and accelerate adoption of your self-service channel.

Grow your revenue

Benefit from incremental revenue generation with the NCR SelfServ 4, by offering product discovery, digital application forms and appointment booking, to create secure, profitable interactions with your customers.

Store management

The NCR SelfServ 4 is designed for a 24x7 environment and uses the same proven technology and parts as our NCR SelfServ ATMs. It can be remotely managed and monitored, ensuring the highest levels of availability and operational excellence. The NCR SelfServ 4 is both EMV and PCI-compliant with NCR APTRA™ applications and is available with NCR's full suite of security offerings.
