

NCR FastLane SelfServ™ Checkout Basket-Over-Bag maximizes self-service for smaller baskets and formats

The NCR FastLane SelfServ Checkout Basket-Over-Bag offers a flexible, efficient way to improve checkout for small format stores or for environments with smaller baskets without compromising the shopper experience.

Provides even more convenience for smaller baskets

The “basket over bag” module on the NCR FastLane SelfServ Checkout solution puts the shopping basket over the bagging area, enabling both the input and output customer activity to happen in the same space. This option is ideal for retailers with basket sizes of one to five items or with limited space at the front end.

Drives more efficiency in less space

By removing the separate input area and adding the “basket over bag” module to existing one-bag self-checkout solutions, five self-checkouts can now fit in the space of four, enabling more transactions in the same amount of space.

Improves the shopping experience

NCR FastLane SelfServ Checkout Basket-Over-Bag speeds up the checkout process by making more checkouts available. Shorter lines, greater privacy, greater control and more choice make consumers happier and more loyal to your brand.

Enables full cash functionality and security features of self-checkout

NCR data indicates that over 80 percent of transactions with less than three items are paid with cash. So even though NCR FastLane SelfServ Checkout Basket-Over-Bag reduces the overall footprint needed in the store, it does not sacrifice any of the cash handling or security features available on NCR FastLane SelfServ Checkout Basket-Over-Bag. This includes cash handling with optional note recycling and security features such as an integrated security scale, a sophisticated self-learning and adjusting weight database, intervention lights and sounds, and attendant-monitoring tools.

Key features

- “Basket over bag” module enables both input and output to happen in same space
- Drives more efficiency with less space
- Offers all the benefits of NCR FastLane SelfServ Checkout including cash handling

Technical specifications

SEAMLESS POINT-OF-SALE (POS) INTEGRATION
